Blackbeard's Pirate Treasure

Ahoy, mates! Nearly three centuries ago, the notorious pirate, Blackbeard, was sailing off the shores of North Carolina when his ship, the Queen Anne's Revenge, sank in 25 feet of water. We need a well seasoned crew to design robots to find and excavate her remains. But there's others in the vicinity that want to get to it first. There's clues we have to solve, and maps to find before we can get to the treasure that's still aboard. Some say a curse has left the canons intact and our real enemy might still be the ship itself. If the mood strikes and the tide low, come and join us on this daring robotic mission.
